About Engineers Board of Kenya

The Engineers Board of Kenya is a statutory body established under Section 3(1) of the Engineers Act, 2011. The Board is responsible for registration of engineers and engineering firms, regulation of engineering professional services, setting of standards, development and general practice of engineering.

About Continuing Professional Development

Continuing Professional Development (CPD) for engineers is a process of continual learning and updating of skills and knowledge required to maintain and enhance the capability to practice in the engineering profession. CPD helps engineers to stay current with new developments and technologies, improve their performance, and increase their job satisfaction. CPD activities include attending workshops, conferences, and seminars, completing online courses, participating in mentoring programs, work-based activities that are engineering in nature and self-directed learning. CPD is important for engineers to stay relevant in their field and provide the best service to their clients.

Legal Basis

Under Section 32(2) of the Engineers Act 2011, CPD is a legal requirement for licensing of registered engineers. The Fifth Schedule of the Engineers Rules 2019 requires engineers registered in Kenya to demonstrate attainment of fifty (50) professional development units (PDUs) per calendar year and fulfill other statutory requirement in order to renew their practising licenses.

Board's Approach to CPD

To meet the training and learning needs of engineers, the Board has adopted a two-mode approach to delivery of the Continuing Professional Development programme: -

Mode 1: Delivery of CPD courses through accredited service providers

The Board will accredit suitable and competent organizations to deliver CPD courses that are relevant for engineers. The Board shall continuously monitor and evaluate service providers to ensure that their courses are relevant for engineers and that the course objectives are being met.

The Board has accredited the following institutions to offer CPD courses for engineers during the 2023 calendar year: -

1. Institution of Engineers of Kenya
2. Association of Consulting Engineers of Kenya
3. Kenya Society of Environmental, Biological and Agricultural Engineers (KeSEBAE)
4. Sustainable Mobility Concepts
5. Institute of Applied Project Management
6. Eenovators Ltd
7. GITS Consulting Ltd
8. Civil One Consulting Engineers Ltd

Mode 2: Implementation of CPD courses by the Board

The Board will organize and implement selected CPD courses, conferences, seminars, and workshops for engineers. The Board intends to implement CPD courses that are tailored to the specific learning and training needs.
